

The Do-Not-Call systems on both the Federal and State level are too important to weaken or destroy. It protects businesses from reaching out and "trespassing" into our private lives with unwanted solicitation and unwanted interruptions. Please do not give in to telecommunication companies and other organizations who feel it is their right to interrupt our lives at their convenience. Please protect and strengthen the Do-Not-Call systems whenever possible, it is a great system and it would be a shame to lose it.
